COMMUNITY BUILDING & LEADERSHIP

Community Engagement & Events Intern | University Information & Services Group

November 2025 - May 2026

- Coordinated engagement initiatives across **100+ university stakeholders**, supporting **5 cross-functional events** attended by **200+ staff and students**.
- Designed an event-mapping framework adopted across **4 teams**, cutting planning time by **30%** across **5 end-to-end events**.
- Conducted usability testing with **50+ students**, identifying recurring UX issues and translating findings into **15 actionable recommendations** for developers to act on.

Founder & President | Finance Frontier

May 2024 - Present

- Founded and led a **7-person team** to deliver financial literacy workshops and publish financial material for **3,500+ young adults** through online campaigns and programs with **10 NGOs**.
- Built **8+ institutional partnerships** with organizations including Rethinking Economics International, London School of Economics, Youth Reach International, and DLF Engage, **expanding Finance Frontier's reach by 60%** across youth organizations.
- Scaled an International Ambassador Program across **13 schools in 6 countries**, training **30 student ambassadors** to deliver financial literacy sessions to **1,000+ peers**.
- Mentored 7 female startup founders on pitch strategy, with **founders securing \$5000 microfunding** and **3 launching new initiatives**.

AI PROJECTS & BUILDING

Full-Stack Developer | [Ryng](#)

March 2026 - June 2026

- Built the first AI agent telecom infrastructure in India, enabling agents to operate over live phone networks, taking the product from concept to **deployment in 2 months**.
- Owned the **full B2B sales cycle** from cold outreach to deployment, converting **10 SME clients** and generating **30+ qualified leads**.
- Shipped UPI payment integration and an agentic context layer within the first 2 weeks of testing, **reducing post-call manual follow-up workflows by 70%** and enabling agents to generate payment links directly from call transcripts.

Full-Stack Developer | [Ori](#): Personal AI Assistant

July 2026 - Present

- Designed a RAG-based personal assistant, integrated the Google Workspace API, delivering retrieval-grounded, cited responses with **92% retrieval accuracy**, validated across **860+ tests**.
- Built a hybrid retrieval pipeline (vector + keyword search + reranking), PII redaction, and scoped access control, optimizing LLM cost by splitting work between deterministic code and model calls.
- Deployed to **3 beta users for daily task management**, iterating on feedback actively to improve response relevance.

PROFESSIONAL EXPERIENCE

Summer Analyst Intern, Business Development | Ernst & Young

June 2026- August 2026

- Pitched **7 investment recommendation decks** to senior stakeholders, with **4 recommendations approved** for further action.
- Developed a PowerPoint automation tool across **2 teams**, reducing repetitive presentation-building time by **45%**.
- Analyzed financials for **150+ companies**, consolidating fragmented data into a centralized database that enabled teams to identify and prioritize **30+ funding opportunities**.
- Designed a secure automation pipeline for real-time financial data access, reducing manual sheet-updating time by **~65%**.

Junior Consultant | 180 Degrees Consulting

January - May 2026

- Selected from **450+ applicants (~9% acceptance rate)**; conducted **30+ employee interviews** at UK-based startup ParkPlay to identify workflow bottlenecks.
- Redesigned onboarding processes to deliver a **37% increase in volunteer onboarding efficiency**.
- Built relationships with **10 multinational partnership targets** through tailored outreach, generating **6 qualified partnership conversations** and creating a pipeline for ParkPlay's national expansion

SKILLS & INTERESTS

Languages: Python, JavaScript, SQL **Tools:** FastAPI, React, LangGraph, SQLite, GitHub

Interests: RAG Systems, Agentic AI, Trading, Equestrian, Piano, Music Composition
